HEINER NAVARRO

Junior Software Developer – Web & Databases

Cartago, Costa Rica | +506 8611 4352 | heinern14@gmail.com | linkedin.com/in/heiner-navarro-8485a316b

PROFESSIONAL SUMMARY

Systems Engineering student (about halfway through the degree) with hands-on experience building a corporate web platform with integrated inventory and sales management, order and quotation modules with real-time data processing and security protocols, and working with relational databases. Background in Java, HTML/CSS and JavaScript, plus IT infrastructure and technical support since 2017. Six years of daily communication with international clients, which helps me turn requirements into working solutions. Advanced English. Available immediately, remote or hybrid.

TECHNICAL SKILLS

- **Development:** web platform development, Java, HTML/CSS, order and quotation management modules, real-time data processing
- **Basic to intermediate knowledge:** JavaScript (React, Node.js, Angular), Python, WordPress, Git
- **Data:** relational database design, management and updates; data integrity
- **Infrastructure:** Windows, Linux (basic CLI) and macOS; virtualization with VMware and VirtualBox; server administration
- **Networking & support:** Cisco IT Essentials and CCNA 1; on-site and remote troubleshooting
- **Soft skills:** client communication, training of new team members, quick learner

PROFESSIONAL EXPERIENCE

Monsol Technologies — Systems Administrator & Developer (Aug 2025 – Present)

- Built a corporate web platform with integrated inventory and commercial management systems.
- Developed order and quotation management modules with real-time data processing and security protocols.
- Administer server infrastructure and relational databases, ensuring operational continuity during critical failures.

Align Technology — CAD Designer (Jun 2019 – Aug 2025)

- Communicated daily with doctors around the world to translate their requirements into 3D treatment plans for orthodontic and surgical cases (6 years of international client communication).
- Optimized and automated workflows in specialized software to reduce manufacturing time.
- Led technical training and onboarding of new team members.

Unifica Tecnología — Developer & Technical Support (2018)

- Developed in Java and built web interfaces with HTML/CSS.
- Provided on-site IT support to client companies (call center, Telecable branches): assembled, maintained and virtualized corporate servers and resolved network and system incidents.

Ministerio de Hacienda — IT Maintenance Technician (2017)

- Managed and updated databases to ensure data integrity.
- Preventive and corrective maintenance of institutional equipment; hardware and software diagnosis.

EDUCATION

- **B.Sc. in Systems Engineering** (in progress, expected 2028) — Universidad Americana (UAM)
- Technical High School Diploma in IT Technical Support — CTP Fernando Volio Jiménez

CERTIFICATIONS & LANGUAGES

- Cisco IT Essentials; Cisco CCNA 1
- English: advanced (EF SET 73/100, C2)
- Spanish: native
